CUSTOMIZED SERVICES

OCCUPATIONAL HEALTH AND SAFETY:

HEALTH&SAFETY

Framinia Health and Safety supports its clients in performing all the necessary activities to guarantee the observance of the prescriptions set forth by the current H&S regulation, The Health and Safety at Work etc Act 1974, ensuring the preparation of all the required documents and related assessments.

SAFETY ON CONSTRUCTION SITES

Framinia Health and Safety offers the consultancy of its Professionals on Health & Safety of construction sites, its Professionals are qualified to hold positions of project supervisor, Safety coordinator during design and execution, drafting and planning of the Safety operational plans.

FIRE-FIGHTING

Framinia Health and Safety offers its proven experience in the industrial sector through its qualified fire-fighting experts. It is therefore able to design, build and certify any type of fire-fighting/prevention device and system in addition to preparing all the necessary paperwork requested by the Fire Authority for licensing public events.

HACCP

The HACCP (Hazard Analysis and Critical Control Point) system originates from the need to guarantee the quality of food and to implement a self-check system which each food producing and distributing operator must use in order to assess and estimate dangers and risks and identify the control measures to prevent the insurgence of health and hygiene issues.

TRAINING

We can design, organize and manage training courses for workers, in compliance with The health and safety (training for employment) regulations 1990.

We can also provide e-learning training, that helps companies to reduce costs and saving time.

All our consultants are skilled Occupational Health & Safety teachers for several sectors of activity and are able to deliver complete training courses addressed to workers engaged in all the main risk branches.

COMPLIANCE

We develop and implement management systems covering a wide range of International standards:

- **OHSAS 18001**
- **ISO 14001**
- **ISO 9001**
- **GDPR**

OHSAS 18001

The BS OHSAS 18001 sets the standards for an Occupational Health & Safety management system in order to allow Companies to control their risks, to improve their performance and to **drastically reduce the costs deriving from the omitted compliance to the accident-prevention rules**. Our professionals are qualified to provide consultancy about the Safety Management Systems and to guarantee the enforcement and continuity of an effective management system for each corporate requirement.

ENVIRONMENTAL MANAGEMENT SYSTEMS (ISO 14001)

Implementing an environmental management system implies designing and applying a system which is aimed at achieving goals and strategies for the environment by controlling the impact on the environment of the corporate activities. The purpose is to set a constant and global approach, resulting in the best process performances and Corporate image.

QUALITY MANAGEMENT SYSTEM (ISO 9001)

Our design, preparation, accomplishment and implementation services concerning Quality Management Systems complying with reference rules are always preceded by a detailed analysis of the corporate situation, which enables us to assess with the Client solutions designed around the Corporate real needs and easy to manage.

GDPR

Framinia Health and Safety is qualified to support its clients during the transition to improve the GDPR as required by the law. UK will apply the EU General Data Protection Regulation, that will replace the current legislation in place, the Data Protection Act 1998.

This **Regulation** will be implemented in all local privacy laws across the entire EU and EEA region. It will apply to all companies selling to and storing personal information about citizens in Europe, including companies on other continents. It provides citizens of the EU and EEA with greater control over their personal data and assurances that their information is being securely protected across Europe. According to the GDPR directive, personal data is any information related to a person such as a name, a photo, an email address, bank details, updates on social networking websites, location details, medical information, or a computer IP address.

All organizations and companies that work with personal data should appoint a data protection officer or data controller who is in charge of GDPR compliance.
